Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Jason Johnston (864/271-1592) on 14 July 2003.
3. The application has been amended as follows:

In the Claims

Claim 9, line 3, after "surface", "thereof" has been changed to -- thereon --.

Claim 14, line 7, immediately after "elastomer", "to" has been replaced with -- with --.

Claim 25 has been cancelled.

Claim 31, line 7, -- colloidal -- has been inserted immediately before "silica".

Remarks

Claims 9 and 14 were amended to correct typographical errors.

Claim 25 has been cancelled because the limitation therein is no longer needed.

Claim 31 has been amended to recite "colloidal silica", so that it conforms to the other base claims.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The base claims are claims 1, 12, 13, 14 and 31. As amended by the examiner's amendment above, they can be summarized as follows:

Claim 1 covers a surface-modified glove comprising:

a rubber matrix shaped like a glove having outside and inside surfaces, and
a plurality of colloidal silica particles adhered to at least a portion of the outside surface and partially embedded therein.

Claim 12 covers a surface-modified article comprising:

a rubber matrix having an outside surface, and
a plurality of colloidal silica particles adhered to the the outside of the matrix without any separate binder, the particles being partially embedded in the outside surface without extending therethrough.

Claim 13 covers a surface-modified article comprising:

a rubber matrix having a surface, and
a plurality of electrically conductive colloidal silica particles adhered to at least at least a portion of the matrix without any separate binder, the particles being partially embedded in the outside surface without extending therethrough.

Claim 14 covers a process for making an elastomeric article comprising the steps:

- providing a mold whose surface defines at least a portion of the surface of the article,
- preparing a coating composition containing a plurality of colloidal silica particles,
- applying the coating to the surface of the mold,
- contacting a flowable elastomer with the coated surface of the mold,

Art Unit: 1772

-allowing the elastomer to coalesce against the coated surface to form an article with the colloidal silica particles adhering to the coalesced elastomer,

-separating the coalesced elastomer from the mold so that it is turned inside out, wherein the elastomeric article has inside and outside surfaces and the colloidal silica particles are adhered to the outside surface.

Claim 31 covers a surface-modified glove comprising:

an elastomeric matrix shaped like a human glove, said matrix having an inside surface for contacting a human hand and an outside surface, and

a surface treatment adhered to at least a portion of the outside surface of said glove, the surface treatment comprising a plurality of colloidal silica particles that are partially embedded in the outside surface of the glove.

5. None of the prior art of record teaches or suggests articles/gloves or processes of making same that employ colloidal silica in a manner yielding the articles/gloves or processes covered by the base claims.

Citation as of Interest

6. Nash (US 5,620,773) teaches the use of hydrophilic silica in a layer on the inner surface. It distinguishes its silica from hydrophobic colloidal silica at col. 3, lines 1-17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1772
